

Metrotile Bond

Metrotile[®]
worldwide roofing systems

A traditional and attractive roof with timeless effect.

The **Metrotile Bond** profile is designed to get the same appearance of the traditional clay roof style, with the additional benefits of steel roofing. Because of the downturned front and the upturned rear edges, the panels have a strong overlapping and interlocking tile covering, which provides an excellent durability, protection and resistance to wind lift or other extreme weather conditions.

Metrotile Bond is an eight tile, stone-coated panel pressed from a high grade of Aluzinc[®] coated steel and is available in a wide selection of colours to enhance any exterior colour scheme.

Properties

Lightweight

Light and easy to handle and install.

Durable

Colour stability and protects against UV light.

Stable

Resistance to extreme wind or earthquakes.

Strong

Exceptional strength and resistant to damage.

Fire proof

To be conform with the European standards

Installation of the tiles

The Metrotile eight tile panels can be interlocked either right over left or left over right with the side laps of one small corrugation.

The panels are placed onto battens spacing 368 mm.

The downturned front edge and the upturned rear edge of each tile provides a strong, weatherproof, overlapping and interlocking roof covering. Each panel is secured by 4 nails in the front downturned edge into the side of the batten, positioned out of the water course.

Each panel or accessory can be cut or bent in the shape of the roof. It is important to use tools recommended by Metrotile.

Accessories

Metrotile offers a broad choice of accessories that fully integrate with the Metrotile Bond profile.

• Ridges, junctions and end caps.

For use on ridges and hips in angle, square, rounded shape.

• Barges, flashings and finishings.
